CORGI EM-9550 WHEEL BALANCER

Fast, accurate, reliable and easy-to-use Manual wheel clamping with quick nut. Auto width measurement sonar. The data arm automatically inputs the offset and diameter. Stick on weight application with laser pointer at 6 o'clock. Wheel is stopped and locked automatically in the correct position to apply the weights. Hidden weight mode hides stick on weights behind the spokes. Space saving wheel guard (patented) allows positioning against the wall. Multi operator program allows 3 operators to use the machine simultaneously.
